#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2) Claims 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Weiler et al (5472068).

In re claim 10, Weiler et al provides a cast brake caliper (abstract) for a disc brake assembly including: a cast brake caliper having an inboard leg portion and an outboard leg portion (figure 2) which are interconnected by and intermediate bridge portion (4), the caliper having a pair of location surfaces (3) provided on the inboard leg portion and a locating surface (8) provided on the outboard leg portion; the locating surfaces are integrally formed by a core member of a casting apparatus during the casting of the caliper. Please note that it is inherent that the member of Weiler's caliper are integrally formed.

IN re claim 11, please note that a number of portions of Weiler can be considered a locating surface, for example the portion which allows item (8) to seat is a recess.

Applicant should further define what is meant by a location surface.

In re claim 12, please note that the location surfaces on the inboard leg are flat.

IN re claim 13, see figure 1.

## Claim Rejections - 35 USC § 103

3) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4) Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weiler et al (5472068) in view of Kobayashi et al (5518062).

Weiler et al is silent to the type of mold used to cast the caliper.

Kobayashi et al teaches different molds used to cast brakes.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have made the cast caliper of Weiler et al by either a vertical or horizontal mold as taught by Kobayashi et al depending on the orientation of the parts to be cast and the difficulty of forming the mold.

## Response to Arguments

Applicant's arguments filed 6/24/05 have been fully considered but they are not persuasive. Applicant's amendment adds the limitation, "the locating surfaces defining datum surfaces for determining one or more planes of the brake caliper for subsequent machining of selected surfaces of the brake caliper to predetermined tolerances". Please note that this just recites the intended use of the device and the locating surface of Weiler et al can be considered a datum surface. Further, it is inherent that the elements of Wieler et al are integrally formed.

Art Unit: 3683

#### Conclusion

6) THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devon C. Kramer whose telephone number is 571-272-7118. The examiner can normally be reached on Mon-Fri 8-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 571-272-7095. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
